

## Appointment of Enrico Piccioli as an Independent Advisor to the Board of Directors

Enrico Piccioli, joins RPC Technologies as an Independent Advisor to the Board of Directors. Graduated from Politecnico di Milano at 21 years of age – the youngest engineer in Italy, a Doctorate of Civil Engineering with a Thesis on Reinforced Plastics. He holds several prestigious memberships including fellowship to the Institute of Engineers Australia and brings to us 40 years experience in corrosion protection, reinforced plastic composites, structural steel fabrication, heavy engineering and the construction industry.

In 1973 Enrico commenced his working life in Australia with Transfield in the capacity of Manager - Fibre Reinforced Plastic Division – the predecessor of RPC Technologies. This was a new operation of the Transfield Group for which he was employed by the Company to commence and develop. He was responsible for initially developing market acceptance and the Australian Standard for a new material (reinforced plastics) in the industrial market of large diameter pipes and tanks in Australia.

In 1974 Enrico was appointed General Manager, Fibre Reinforced Plastic (FRP) Division reporting to the Managing Director of Transfield Pty Ltd.

From 1974 to 1998 Enrico held several Senior Positions within Transfield and was instrumental in executing major projects and as Director of Manufacturing was responsible for expansion of the Transfield Group into USA in 1985. He was also responsible for establishment of Transfield workshop facilities in Houston USA, Jakarta Indonesia and Kuala Lumpur Malaysia.

As Founder and Managing Director of EPTEC Pty Ltd, he has grown the company's workforce to 250 people, with an annual turnover of \$30M.

Please join me in welcoming Enrico to the Board of Directors. With his wealth of knowledge and experience, he will be an asset to the Board in developing and facilitating conceptual approaches on a Strategic front.

Regards

Tony Caristo  
Managing Director
