RPC Technologies – Victorian Operations Update

The construction of RPC's new flagship facility in Corio, Geelong, remains on-track to commence operations in May. The 5,180m² purpose built factory is scheduled to be at lock-up by the end of February. Equipment installation and commissioning will commence from early March. With significant assistance from the Geelong Investment and Innovation Fund, RPC have been able to design a facility that includes all the specialist equipment necessary to service each of its key markets.

Specialist Equipment for the Corio Facility Nearing Completion

February has also seen RPC Technologies receive a Letter of Intent for the first works to be programmed for the new facility. This is a significant milestone achievement, and it is hoped that more announcements in relation to successful project awards will be forthcoming in the future months.
